IN THE SPECIFICATION

[29] When the sliding carriage 26 ~~22~~ is shifted such that the roller blind 14 is withdrawn from the sliding cartridge 26, the pressure slider 38 presses the clip 36 onto the detent web 34 so that it is locked in place. When the sliding carriage 26 is shifted in the opposite direction so that the roller blind 14 is received on the coiling body 12, the release slider 40 will move between the clip 36 and the detent web 34 so that the roller blind 14 is released from the guide rail 22 to be coiled up.
